

INVESTMENT POLICY SUMMARY

The investment objective of the fund is to provide a total return equivalent to that of the MSCI World (Developed Markets) Index, in South African Rand. The portfolio shall seek to achieve this objective by investing as far as is possible and practicable in the constituents of the MSCI World Index (Developed Markets) as well as assets in liquid form and financial instruments for efficient portfolio management purposes. The manager intends to use optimisation techniques in order to achieve a similar return to the Index and it is therefore not expected that the portfolio will hold each and every underlying constituent of the Index at all times or hold them in the same proportion as their weightings in the Index. However, from time to time the portfolio may hold all constituents of the Index. The combination of shares will enable the Manager to track the performance of the MSCI World Index (Developed Markets). The fund is rebalanced quarterly.

WHY CHOOSE THIS FUND?

*Investors wanting to invest South African Rand to gain exposure to world equity markets at a compelling cost.

*No foreign exchange tax clearance is required.

FUND INFORMATION

ASISA fund classification	Global - Equity - General
Risk profile	Aggressive
Benchmark	MSCI World Index (ZAR)

PERFORMANCE (ANNUALISED)

Retail Class	Fund (%)	Benchmark (%)
1 year	29.24	30.33
3 year	16.19	17.09
5 year	17.60	18.76
10 year	14.52	15.63

Annualized return is the weighted average compound growth rate over the period measured.

ACTUAL HIGHEST AND LOWEST ANNUAL RETURNS*

Highest Annual %	29.24
Lowest Annual %	(1.01)

FEES (INCL. VAT)

	Retail Class (%)
Advice initial fee (max.)	N/A
Manager initial fee	N/A
Advice annual fee (max.)	1.15
Manager annual fee	0.79
Total Expense Ratio (TER)	0.86
Transaction Cost (TC)	0.04

Advice fee | Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor. The portfolio manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. This fund is also available via certain LISPS (Linked Investment Service Providers), which levy their own fees.

Total Expense Ratio (TER) | The TER is the charges incurred by the portfolio, for the payment of services rendered in the administration of the CIS. The TER is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 3 years. The TER is calculated from 01 January 2021 to 31 December 2023. A higher TER does not imply a poor return nor does a low TER imply a good return.

The Transaction Cost (TC) is the cost incurred by the portfolio in the buying and selling of underlying assets. This is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 3 years. Obtain the costs of an investment prior to investing by using the EAC calculator provided at www.satrix.co.za

PORTFOLIO QUARTERLY COMMENTARY - 31 DEC 2023

2023 got off to a rocky start, with markets fearing a possible global recession, ongoing conflicts in the Middle East, and Russia's continued assault on Ukraine. However, inflation would soften quicker than expected, changing investor sentiment as reserve banks around the globe paused on rate hikes. Contrary to the expected recession, there was an Artificial Intelligence (AI) boom which saw stocks like NVIDIA climbing to returns north of 200% for the year. The fixed-income and equity markets rallied, with Information Technology becoming one of the most rewarded sectors for the year.

As the US Federal Reserve (Fed) transitioned from a hawkish outlook to being neutral, and then dovish on interest rates, the markets started to propel upwards. The conflicts in the Middle East also brought about uncertainty in oil prices, with Brent oil ending the quarter at US\$77.04 a barrel, a 14.7% decrease from the start of the quarter. The Fed's dovish comments and anticipation of rate cuts drove the gold price, which hit a record high of US\$2 077 in November and ended the quarter at US\$2 062.59, up 11.6% since the beginning of the quarter. The US 20-year Government Bond yield eased from its record 5.29% level and closed the quarter at 4.18%.

Top performing sectors in the US were those most sensitive to interest rates, including information technology, real estate and consumer discretionary. The energy sector posted a negative return with crude oil prices weaker over the quarter. The final quarter of the year was a strong one for Eurozone shares, boosted by expectations that there may be no further interest rate rises. Top gaining sectors in the Eurozone included real estate and information technology, while healthcare and energy were the two main laggards, registering negative returns. UK equities rose over the quarter. UK small and mid-cap indices outperformed the broader market as domestically-focused stocks performed very strongly.

The overall macroeconomic conditions in Japan continued to improve. Somewhat sluggish Q3 GDP data were driven by higher inflation associated with slower wage growth. However, the Bank of Japan (BOJ) Tankan survey released in December showed continuous improvement in business sentiment for both the manufacturing and non-manufacturing sectors. Capital expenditure plans also suggested that there would continue to be strong demand in machinery and IT services companies. The BOJ made gradual steps to normalise its extraordinary monetary easing policy at the end of October and continued to hint that they are likely to take further actions early 2024.

Portfolio Performance and Changes

The Satrix MSCI World Index Fund tracks the performance of the MSCI World Index. In rand terms, the fourth quarter saw the MSCI World Index go up 8.2% (11.42% in US dollar terms). The MSCI World Index captures large and mid-cap representation across 23 developed market countries. With 1 510 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in each country. The fund tracks the index through a process of optimisation with an ex-ante tracking error varying around 10 basis points.

Issue Date: 19 Mar 2024

RISK PROFILE (AGGRESSIVE)

This is an aggressively managed, high-risk portfolio that aims to deliver capital growth over the long term (greater than 5 years). It is designed to track the benchmark and is a pure equity fund. There may be some capital volatility in the short term, although higher returns may be expected from five years or beyond.

Trustee

Standard Chartered Bank, Tel No.: 011 217 6600, E-mail: southafrica.securities-services@sc.com

DISCLAIMER

Although all reasonable steps have been taken to ensure the information on this website / advertisement / brochure is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

*The highest and lowest annualised performance numbers are based on 10 non-overlapping one year periods or the number of non-overlapping one year periods from inception where performance history does not yet exist for 10 years.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily a guide to future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Satrix Managers (RF) (Pty) Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign instruments which could be accompanied by additional risks as well as potential limitations on the availability of market information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Chartered Bank is the appointed trustee of the Satrix Managers Scheme.
